

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM: Behavioral Health Community Case Management Services		PROGRAM ELEMENT: Contract Monitoring			
PROGRAM MISSION: To provide for the overall planning, monitoring, evaluation, and service development of the County's continuum of substance abuse treatment to foster a safe, healthy, and supportive community that strives to help persons with dependence on alcohol and other drugs					
COMMUNITY OUTCOMES SUPPORTED: <ul style="list-style-type: none">• Children and adults who are physically and mentally healthy• Individuals and families achieving their maximum possible level of self-sufficiency• Children and vulnerable adults who are safe					
PROGRAM MEASURES	FY02 ACTUAL	FY03 ACTUAL	FY04 ACTUAL	FY05 BUDGET	FY06 CE REC
Outcomes/Results:					
Percentage of monitored contracts that report outcome measures with improved results	NA	66	50	65	70
Service Quality:

Percentage of monitored contracts using a customer satisfaction survey	25	40	58	80	100
Efficiency:					
Average administrative cost for monitoring functions per customer (\$)	132	130	133	145	150
Workload/Outputs:					
Number of contracts monitored	8	12	12	12	13
Number of customers served through all monitored contracts ^a	2,705	3,077	3,164	3,000	3,200
Inputs:					
Total expenditures (\$000) ^b	3,330	3,300	3,936	3,873	3,515
Expenditures for administration (\$000)	357	400	420	435	480
Workyears	4.8	4.8	4.4	4.8	4.1
Notes: ^a The number of customers served does not include those served through the Dade Bering Urine Monitoring contract. ^b Total expenditures are for contracts and include funds awarded by the County, the Alcohol and Drug Abuse Administration, the Federal High Intensity Drug Trafficking Area (HIDTA) Grant, and the Federal Block Grant. These resources fund the delivery of substance abuse treatment services that are not reimbursed by insurance. The amount of total contract expenditures decreased between FY04 and FY06 due to the elimination of the psychiatrists' contracts from the total cost starting in FY04; the partial elimination of the Center for Substance Abuse "Substance Abuse for Women" grant (which has partial funding for FY05 and no funds budgeted for FY06); and the effect of cost containment by the State Alcohol and Drug Abuse Grant for part of FY04, which was then annualized for FY05 and FY06.					
EXPLANATION: Staff are responsible for overseeing a continuum of substance abuse treatment services for adult residents. The oversight of publicly-funded services includes outpatient, residential, case management, psychiatric, and halfway house services. Staff also interface and collaborate with consumers, advocates, all service areas within the Department of Health and Human Services, and other public and private providers in the County. These programs are operated by independent vendors, and progress toward achieving the County's desired results for customer satisfaction and improved outcomes has been slow. While the FY04 goal of having 76% of monitored contracts using a customer satisfaction survey was not met, the 58% actual rate is an improvement over the FY03 rate of 40%. The County is moving to performance-based compensation as an incentive to reach desired outcomes in FY05. Also in FY05, all programs will be required to have customer satisfaction surveys in place to meet State requirements.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Juvenile Assessment Center, Community Re-entry Services; Maryland Department of Health and Mental Hygiene; Maryland Department of Parole and Probation; Coalition for the Homeless; Housing Opportunities Commission; providers participating in the Public Mental Health System; County-funded mental health providers; Department of Correction and Rehabilitation.					
MAJOR RELATED PLANS AND GUIDELINES: Maryland Alcohol and Drug Abuse Administration, Federal High Intensity Drug Trafficking Area Initiative, Department of Parole and Probation (for Break the Cycle).					

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM:

Behavioral Health Community Case Management Services

PROGRAM ELEMENT:

Urine Monitoring Program

PROGRAM MISSION:

To provide for the accurate, timely, and cost-effective collection, analysis and reporting of urine samples for illicit drug use to assist residents of Montgomery County who are referred for services due to criminal justice, social service, or treatment needs

COMMUNITY OUTCOMES SUPPORTED:

- Children and vulnerable adults who are safe
- Children and adults who are mentally and physically healthy

PROGRAM MEASURES

	FY02 ACTUAL	FY03 ACTUAL	FY04 ACTUAL	FY05 BUDGET	FY05 CE REC
Outcomes/Results:					
Percentage of drug tests that were accurate	95	100	99.9	99	99
Service Quality:					
Percentage of urine samples analyzed and results released within 24 hours	95	95	95	95	97
Percentage of urine samples analyzed and results transmitted electronically via HATS ^a within 24 hours of sample collection	91	95	95	95	97
Efficiency:					
Average cost per sample analyzed (\$) ^b	7.23	8.16	7.60	7.26	6.66
Percentage of user agencies linked to HATS ^a for electronic reporting of urine analysis results	98	95	95	98	98
Workload/Outputs:					
Number of samples accepted for analysis ^c	74,384	75,364	87,920	82,500	89,000
Number of agencies linked for electronic results	40	50	56	52	60
Inputs:					
Expenditures (\$000) ^b	538	615	668	599	593
Workyears ^b	9.8	10.0	9.3	8.3	8.3

Notes:

^aHATS stands for HIDTA (High Intensity Drug Trafficking Area) Automated Tracking System.

^bExpenditures include only personnel costs. The cost of infrastructure or hardware for HATS is not included (this is Federally funded), nor is the cost of chemicals and materials for assays (from multiple funding sources, including County, State, and Federal grant funds). Staff workyears and/or expenditures were reduced for FY04 through FY06.

^cFewer agencies are projected to use the Behavioral Health Community Case Management lab facility in FY05, which will result in a decline in the number of samples. However, the number of samples is expected to increase in FY06 with the addition of testing for Corrections clients.

EXPLANATION:

The Urine Monitoring Program provides Montgomery County's Department of Health and Human Services and allied agencies with a resource for obtaining low-cost testing of urine samples for drug abuse. To support community efforts to improve public health and public safety, access to such tests needs to be "on demand," and results need to be delivered in an accurate and timely manner. The program partners with a wide range of criminal justice, human service, and substance abuse treatment agencies that work with the adults, families, and youth who are served by this program.

In FY04, the Urine Monitoring Program was successful in maintaining high performance results. The percentage of drug tests that were accurate was 99.9%. Additionally, both the percentage of samples analyzed and results released within 24 hours and the percentage of urine samples analyzed and results transmitted electronically within 24 hours of sample collection remained at 95%. The program was also able to reduce the cost per test from \$8.16 in FY03 to \$7.60 in FY04 due to the increased efficiency of the new lab equipment installed in mid-FY04.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Department of Correction and Rehabilitation, Department of Parole and Probation, Maryland Department of Juvenile Services, Child Welfare Services, Circuit Court - Family Division, substance abuse treatment sites, Mental Health Association, community providers.

MAJOR RELATED PLANS AND GUIDELINES: Maryland Alcohol and Drug Abuse Administration State Plan, Federal High Intensity Drug Trafficking Area Initiative, Department of Parole and Probation (for Break the Cycle), Maryland Department of Juvenile Services (for Graduated Sanctions and Break the Cycle Early).

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM: Behavioral Health Specialty Services		PROGRAM ELEMENT: Adult Behavioral Health Program			
PROGRAM MISSION: To improve the mental health of adult consumers with serious behavioral health problems who are not eligible for the Public Mental Health System or are in need of non-traditional outpatient mental health services because of lack of success in standard services					
COMMUNITY OUTCOMES SUPPORTED: <ul style="list-style-type: none">• Children and adults who are mentally healthy• Children and vulnerable adults who are safe• Individuals and families achieving their maximum level of self-sufficiency					
PROGRAM MEASURES	FY02 ACTUAL	FY03 ACTUAL	FY04 ACTUAL	FY05 BUDGET	FY06 CE REC
Outcomes/Results:					
Percentage of clients showing improvement in functioning and decreased symptoms:					
- By therapist rating ^a	94	97	97	95	90
- By symptoms list ^a	94	86	78	90	90
Service Quality:					
Percentage of clients receiving psychotherapy services who are satisfied with those services	99	98	95	95	90
Percentage of records which on first internal review exhibit satisfactory compliance using COMAR standards	90	90	92	90	90
Percentage of telephone referrals initially contacted within 3 days (State Standard = 10 days)	92	92	95	95	95
Efficiency:					
Percentage of clinician hours per year spent in direct services	62	61	58	62	60
Workload/Outputs:					
Number of clients provided psychotherapy in the office	313	334	342	^b 450	^b 410
Number of psychiatric services provided in the office	1,478	1,717	2,096	1,720	1,720
Number of clients provided direct assessment/referrals at outreach sites	471	189	150	100	100
Number of customers provided telephone information	461	487	380	360	400
Inputs:					
Expenditures (\$000)	707	813	810	1,007	1,099
Workyears	9.1	9.6	9.5	9.0	10.0
Notes: ^a Assessment tools are used to evaluate clients' progress regarding psychological symptoms and social functioning. The therapist scale is completed by the clinician alone, while the symptom checklist is completed by the therapist and client together. In FY02, data were only collected at discharge for clients with planned termination. In FY03, a change was made to measure the amount of improvement 4 months after admission. This timeline permits the collection of data on more clients but has also meant somewhat lower results. ^b The number of patients projected to be served in FY06 reflects an additional capacity of approximately 70 patients available as a result of increased funding. The FY05 target does not accurately reflect the number of patients who will be treated that year because the increased capacity will not be fully available until the third quarter.					
EXPLANATION: This program changed its scope of services in FY05 to provide traditional and non-traditional behavioral health services, including diagnostic evaluation, psychotherapy, and psychiatric services using best practice methods. In addition, the priority population served has expanded from primarily Hispanic and Vietnamese individuals to anyone who is a high-end user of system services - e.g., persons who are ineligible or unable to access the Public Mental Health System, or who have had prior treatment failures elsewhere. This includes those individuals whose current services are not effective. As capacity allows, those who are not eligible to be served through the Public Mental Health System (such as undocumented persons) will also be treated. By offering culturally-appropriate and uniquely developed mental health services to these individuals - including collaboration and coordination with agencies such as Child Welfare, Child Mental Health, Addiction Services, Adult Protective Services, Parole and Probation, and the Department of Correction and Rehabilitation - the program intends to enhance the mental health and recovery of clients and improve their functioning in the community. As a result of these changes in the population served, it is anticipated that the service quality indicators may decline due to the increased difficulty of treating this group of patients.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: TESS Center, Partner Abuse Services, Victim Assistance and Sexual Assault Program, Child Mental Health Services, School Health, Infants and Toddlers, Addictions Services, Income Support Services, Spanish Catholic Center, Family Works, CASA de Maryland, Immigration Services, Manna, Crisis Center, Proyecto Salud, Mobile Medical.					
MAJOR RELATED PLANS AND GUIDELINES: COMAR 10.21.20, Federal regulations for drug and alcohol abuse.					

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM: Behavioral Health Specialty Services		PROGRAM ELEMENT: Behavioral Health Access to Care				
PROGRAM MISSION: To improve the mental health and sobriety of County residents by helping them access needed outpatient mental health or substance abuse treatment services						
COMMUNITY OUTCOMES SUPPORTED: • Individuals and families that achieve their maximum possible level of self-sufficiency • Children and vulnerable adults who are safe • Children and adults who are physically and mentally healthy						
PROGRAM MEASURES		FY02 ACTUAL	FY03 ACTUAL	FY04 ACTUAL	FY05 BUDGET	FY06 CE REC
Outcomes/Results:

Workyears ^d		11.0	15.0	15.8	15.8	12.0
Notes:						
^a Clients are eligible for the Public Mental Health System if they meet the "clinical necessity criteria" (that is, severity and type of psychiatric symptoms) and either financial or priority population criteria. The system serves those with major mental illness who are most in need.						
^b Referral sources consist of users of the service such as consumers, agencies, programs, or institutions who call into the program requesting assistance with outpatient mental health services.						
^c Expenditures included only personnel costs in FY02 and FY03. Beginning in FY04, all relevant administrative and other staff costs have been included.						
^d From FY02 through FY05, two teams - the Mental Health Access Team and the Client Assessment Team (for addictions) - were budgeted as separate programs. The workyears shown above for those years consist of the combined figures for both teams. In FY06, the teams will be combined into the Behavioral Health Access to Care Team, with a single budget.						
EXPLANATION:						
This team works to improve the mental health of Montgomery County residents by helping them access outpatient mental health services and by identifying patterns, trends, and gaps in access for outpatient mental health services. The team also provides a single point of entry for screening, determination of need, and referral to substance abuse treatment for adult residents with substance abuse disorders and related problems who do not have medical insurance. The team inquires about the consumer's clinical issues, needs, and income eligibility for the Public Mental Health System (PMHS) or for substance abuse services. Consumers with commercial insurance are assisted in accessing treatment services available within their policies, while those without private medical insurance are linked to the PMHS/substance abuse system or helped with locating appropriate community resources. For those with addictions problems, the program primarily refers clients to outpatient substance abuse providers who are partially supported by contracts with the County.						
From FY02 through FY05, two teams - the Mental Health Access Team and the Client Assessment Team (for addictions) - were used to address this function. In 2004, the teams began to co-locate and integrate the two programs. In FY06, the teams will be combined. The combined team, called the Behavioral Health Access to Care Team, has been reconfigured to work more efficiently and effectively.						
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Emergency Services; Income Support Services; providers participating in the Public Mental Health System; Montgomery County Public Schools; Department of Correction and Rehabilitation; Department of Parole and Probation; other Department of Health and Human Services direct services programs; substance abuse treatment providers; private physical and mental health providers.						
MAJOR RELATED PLANS AND GUIDELINES: COMAR regulations for Outpatient Mental Health 10.21.20, Federal regulations for drug and alcohol abuse, American Psych Systems Provider Manual, Federal High Intensity Drug Trafficking Area Initiative, Department of Parole and Probation (for Break the Cycle).

Workyears	3.0	4.0	3.0	2.1	1.8
Notes: ^a As measured by periodic administration of the Child Behavior Checklist (CBCL), an instrument that assesses eight domains or areas of behavior such as anxiety, delinquency, aggression, and social problems. The CBCL, which is part of a national evaluation of the program required as a condition of Federal funding, is administered as a baseline assessment, with follow-up assessments every 6 months. ^b Parent/caregiver stress level and satisfaction with service coordination efforts are measured by two separate questionnaires. The parent/caregiver satisfaction questionnaire is administered quarterly and is used to improve future service coordination efforts. The stress level questionnaire is administered every six months. ^c The percentage of children, youth, and families receiving community-based mental health and other support services is a new measure for FY06. ^d The average annualized cost for residential treatment services is approximately \$120,000 per child per year.					
EXPLANATION: The Community Kids program was first funded in FY00 and became operational during FY01. The program was created through a six-year Federal grant awarded by the Substance Abuse and Mental Health Services Administration (SAMHSA) of the U.S. Department of Health and Human Services. The grant ends in August 2005. During the six years of the grant, the Community Kids project has extended its family-centered decision-making structure and wrap-around services approach to a sequence of neighborhoods by working in tandem with Montgomery County departments and other government agencies as it built multi-agency collaborative teams including family and community members. Community Kids targets children and youth ages 5-18 (kindergarten through high school). The goal is to build a system of care for emotionally disabled children and their families. This is being accomplished by delivering wrap-around services, building resource teams, community councils, pooled funding, integrated services, and family involvement. The program supports community efforts to integrate child and family service agencies into a local, family-centered, culturally competent system of care. The program continues to work on developing methods for engaging families sufficiently to make significant progress with most children for whom the services are designed.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Montgomery County Collaboration Council, Montgomery County Police Department, Montgomery County Public Schools, Core Service Agency, Mental Health Association, Local Coordinating Council, Maryland Department of Juvenile Services, Youth Service Centers, Community Ministries, Community Use of Public Facilities, Housing Opportunities Commission, Johns Hopkins University, Family Services Agency, Inc., Federation of Families, National Alliance for the Mentally Ill, SHARP Street Suspension Program, City of Gaithersburg, Upper County YMCA, Head Start Bureau, NAACP.					
MAJOR RELATED PLANS AND GUIDELINES: The Children's Agenda, Comprehensive Strategies Plan, After School Activities Plan, Early Childhood Collaborative Plan.					

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM: Child and Adolescent Mental Health Services		PROGRAM ELEMENT: Silver Spring Child and Adolescent Outpatient Mental Health Clinic				
PROGRAM MISSION: To improve the mental health of children and adolescents through individual, family, and group therapy and substance abuse education

Number of psychiatric medication monitoring sessions provided for clients who completed their treatment at the time of discharge ^c		377	630	790	700	750
Inputs:						
Expenditures (\$000) ^d		245	382	477	645	663
Workyears		7.5	7.5	8.5	8.5	8.5
Notes: ^a The Global Assessment of Functioning (GAF) instrument is used to assess the psychological, social, and occupational functioning of an individual on a mental health continuum. ^b A questionnaire is given to each client at the time of discharge. ^c The increasing number of medication management sessions is due to the increasing severity of the symptoms exhibited by clients at the time of admission and throughout treatment. ^d In July 2002, Maryland Health Partners (MHP) stopped compensation of Gray Zone (uninsured) clients. In October 2004, the State of Maryland Administrative Services organization changed. American Psychiatric Services (APS) replaced MHP. APS follows the same guideline for funding uninsured (Gray Zone) clients. Note that the Clinic is the only provider in the County serving undocumented clients: due to a 50% increase in the number of undocumented and uninsured clients, revenue collection decreased in FY04.						
EXPLANATION: The Child and Adolescent Mental Health Services Clinic is a countywide outpatient mental health program located in Silver Spring that serves low income families who are uninsured, undocumented, or who have Medical Assistance. The clinic provides individual, family, and group therapy as well as substance abuse education. The clinic also provides mental health treatment, family support services, and clinical case management at local schools and other County locations. The goal of the program is to assist children who are experiencing serious emotional and behavioral problems while they remain in the community whenever possible. It is commonly accepted that children tend to do better in treatment when their families can be actively involved, participating in and supporting their treatment. At the time of admission, the primary therapist formulates a number of short-term and long-term treatment goals for the client/family. At the time of discharge, these goals are reevaluated to determine how many have been achieved by the client/family. Some clients/families achieve all of their treatment goals, some achieve some of their goals, and some achieve none by the time of discharge. The Global Assessment of Functioning (GAF) instrument is used to assess the psychological, social, and occupational functioning of an individual on a mental health continuum. The GAF score is measured at admission and at discharge. The goal is to increase the percentage of clients showing an improvement in their functioning at home, at school, and in the community. In FY04, 97% of clients who completed their treatment and who attended/participated in at least five therapy sessions with their therapist and/or psychiatrist showed an improvement in their GAF scores. This is a significant improvement over last year's performance. During FY04, 96% of clients met their treatment goals at the time of discharge.						
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Montgomery County Public Schools, Department of Juvenile Services, Juvenile Assessment Center, Multicultural Mental Health Program, Public Health Services, Child Welfare Services, Community Kids, Emergency Support Services, Income Support Program, Crisis Center, Silver Spring YMCA, community hospitals, Police Department.						
MAJOR RELATED PLANS AND GUIDELINES: State COMAR Regulations 10.21.16, 10.21.17, 10.21.20; Federal regulations (HIPAA).						

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM: Criminal Justice/Behavioral Health Services		PROGRAM ELEMENT: Clinical Assessment and Triage Services (CATS)			
PROGRAM MISSION: To provide more appropriate care for offenders identified as having a significant behavioral health problem in the community and/or the Montgomery County Correctional Facility					
COMMUNITY OUTCOMES SUPPORTED: <ul style="list-style-type: none">• Children and vulnerable adults who are safe• Children and adults who are mentally healthy• Safe communities

Number of inmates eligible for diversion	216	302	365	325	390
Number of inmates with behavioral health symptoms successfully diverted into community behavioral health treatment ^a	168	280	357	280	350
Inputs:					
Expenditures (\$000) ^b	425	537	625	663	549
Workyears ^b	5.3	5.3	5.8	6.3	6.3
Notes: ^a Individuals who are eligible for diversion are those who are identified with a behavioral health issue, and who have been found to be appropriate for and willing to be placed in treatment. Community treatment includes substance abuse and mental health treatment agencies. However, most inmates who are diverted to community treatment are treated for substance abuse problems. ^b Includes increased workyears assigned to this effort beginning in FY04. In order to improve CATS' ability to monitor clients with behavioral health issues in the community, staffing changes were implemented in FY05. Includes operating expenses budgeted in the Service Chief's office in FY02 - FY05. For FY06, operating expenses are budgeted directly in the program.					
EXPLANATION: The Clinical Assessment and Triage Services (CATS) program strives to reduce the length of stay at the Montgomery County Correctional Facility and provide appropriate care for offenders identified as having a behavioral health issue and who are eligible for diversion by placing them into community behavioral health treatment. Those inmates with behavioral health issues who are not eligible for diversion are assigned to the appropriate level of care at the Montgomery County Correctional Facility. Staff from the CATS program assess inmates with behavioral health disorders at intake. This program is designed to avoid unnecessary confinement (which can exacerbate psychiatric symptoms) and to prevent the jail from becoming, by default, a hospital for mental illness. CATS staff identify inmates at risk of hurting themselves or others; refer inmates to Corrections Mental Health Services for housing, immediate observation, and mental health services; make referrals for psychiatric medication; clear inmates to be housed with the general population if appropriate; or divert eligible inmates to an available community resource providing a level of service appropriate to manage the treatment needs of the individual. Beginning in January 2004, assessments are also being performed at the Pre-Trial Services Unit. Individuals who are eligible for diversion are those who are identified with a behavioral health issue, have been found to be appropriate for and willing to be placed in treatment, are charged with a misdemeanor or nonviolent felony, have a limited number of failures to appear and no other legal barriers, and can be matched with appropriate treatment agencies within the community. Release to community placement is based on judicial release-on-bond conditions and pre-trial services supervision. Clients are placed in community-based treatment using diagnostic criteria from the American Society of Addiction Medicine Patient Placement Criteria (if their primary problem is an addictions problem) or criteria from the Diagnostic and Statistical Manual of Mental Disorders, Version 4 (if the problem is primarily of a mental health nature). This diversion and referral program has been able to increase the number of inmates assessed and diverted with only a slight increase in funding. In FY04, more inmates could be assessed because all relevant program positions were filled during the course of the year. The outcome data reflect positive performance trends as a result of the program operating at full capacity.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Core Service Agency, Police Department, Department of Correction and Rehabilitation, the Courts, substance abuse and mental health treatment providers, Public Defender Service, State's Attorney's Office, private attorneys.					
MAJOR RELATED PLANS AND GUIDELINES: Code of Maryland (COMAR) for Addictions and Mental Health Services; American Society of Addiction Medicine Patient Placement Criteria, Second Edition - Revised (ASAM PPC-2R); the Diagnostic and Statistical Manual for Mental Disorders, Version 4; Federal confidentiality regulations.

Notes: ^a Referrals come from Jail Addiction Services (JAS), the Crisis Intervention Unit (CIU), Moral Reconation Therapy (MRT), and General Population programs who are discharged to community-based treatment and seeking access to community-based services. ^b Inmates identified as homeless are those incarcerated individuals who have been documented as homeless by self report or who have become homeless as a result of their incarceration. Inmates identified as homeless can enter a shelter or residential treatment bed directly from the Montgomery County Correctional Facility. ^c FY02 only includes inmates who participated in the JAS program. As of FY03, the measure includes inmates who have participated in JAS or the CIU and who are rearrested in the same fiscal year. ^d Includes operating expenses budgeted in the Service Chief's office in FY02 - FY05. For FY06, operating expenses are budgeted directly in the program.					
EXPLANATION: Community Re-Entry Services (CRES) seeks to ensure a successful return to a productive life in the community for offenders at the Montgomery County Correctional Facility who have behavioral health problems. CRES staff provide services to reduce the rate at which these former inmates re-offend and thus, return to incarceration. Staff coordinate diversion before sentencing by providing a recommended diversion plan to the judge. Staff also arrange for diversion after sentencing by going back to the trial judge for a modification of the sentence. The purpose is to connect to treatment those offenders who suffer from behavioral health disorders and who participate in structured treatment within the Correctional Facility and/or, in some cases, offenders who transition from the Department of Correction and Rehabilitation after serving a period of incarceration. Criminal justice supervision combined with participation in treatment helps ex-offenders remain crime-free and symptom-free longer. Court sentences that mandate treatment are instrumental in motivating offenders to engage in treatment upon release. Participation in community-based treatment shortly after release from the Montgomery County Correctional Facility lengthens time in treatment, reduces the odds of recidivism, protects the community, and reduces the chances of individuals with behavioral health disorders ending up in other institutions. This assessment, case management, and referral program was able to increase the number served in FY04 with only a slight increase in funding, thus reducing the cost per service. In FY04, a greater number of inmates was assessed because all of the positions related to the program were filled during the course of the year.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Montgomery County Police Department, Department of Correction and Rehabilitation, judges in the Court System, Department of Parole and Probation, Public Defender System.					
MAJOR RELATED PLANS AND GUIDELINES: Code of Maryland (COMAR) for Addictions and Mental Health Services; American Society of Addiction Medicine Patient Placement Criteria, Second Edition - Revised (ASAM PPC-2R); the Diagnostic and Statistical Manual for Mental Disorders, Version 4; Federal confidentiality regulations.					

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM:

Criminal Justice/Behavioral Health Services

PROGRAM ELEMENT:

Jail Addiction Services (JAS)

PROGRAM ELEMENT MISSION:

To provide an intensive treatment program for alcohol and/or drug addicted inmates at the Montgomery County Correctional Facility (MCCF) in order to (1) reduce harm to individuals, families, and the community, and (2) increase the ability of individuals and families to be self-sufficient

COMMUNITY OUTCOMES SUPPORTED:

- Children and adults who are physically and mentally healthy
- Individuals and families achieving their maximum possible level of self-sufficiency

PROGRAM MEASURES

	FY02 ACTUAL	FY03 ACTUAL	FY04 ACTUAL	FY05 BUDGET	FY06 CE REC
Outcomes/Results:					
Percentage of clients successfully discharged from treatment	78	78	82	78	78
Percentage of clients readmitted	18	20	16	18	18

Inputs:					
Expenditures (\$000) ^b	418	445	471	481	523
Workyears ^b	5.0	6.3	6.3	6.3	6.3

Notes:

^aIncludes only funds for treatment in the Department of Health and Human Services budget. Does not include housing, food, and other related costs which are provided by the Department of Correction and Rehabilitation.

^bIncludes operating expenses budgeted in the Service Chief's office in FY02 - FY05. For FY06, operating expenses are budgeted directly in the program. Starting in FY03, additional staff and increased capacity were included for the JAS program in the new Montgomery County Correctional Facility.

EXPLANATION:

Criminal justice and addiction research indicates that combining criminal justice supervision and addiction treatment in a program of graduated sanctions controls an offender's behavior in the community so that an effective amount of treatment can be delivered. Individuals who stay in treatment the longest are those who are involved with the criminal justice system. A two-year outcome study of the Jail Addiction Services (JAS) program in Montgomery County proved the effectiveness of this strategy. Participation in this intensive ten-week jail-based residential addiction treatment program for alcohol and/or drug addicted inmates at the Montgomery County Correctional Facility (MCCF) reduced the probability of re-offending by 45%. Participation in community-based treatment after JAS, which lengthens the time in treatment, reduced the odds of recidivism by over 75%.

The somewhat lower performance results in FY03 were partly due to significant staff vacancies during the period. In FY04, this jail-based addiction treatment program was able to significantly increase the number of clients treated with only a slight increase in funding, thus reducing the cost per service. In FY04, 82% of clients were successfully discharged, and only 16% of clients were readmitted. In addition, only 18% were re-incarcerated within 6 months.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Department of Correction and Rehabilitation, Criminal Justice System, out-of-state long-term residential treatment programs.

MAJOR RELATED PLANS AND GUIDELINES: Code of Maryland (COMAR) for Addictions Services; Maryland Alcohol and Drug Abuse Administration; Department of Health and Mental Hygiene, Office of Health Care Quality.

Expenditures - excluding grants (\$000)	1,953	2,117	2,550	2,873	^f 5,401
Workyears	26.0	26.0	^e 32.0	32.0	^f 41.5
Notes: <p>^aThe percentage of clients who remain housed is measured by comparing grant or services recipients with those evicted in the following year as reported in records from the Office of the Sheriff and those who entered homeless services as reported by the Homeless Tracking System.</p> <p>^bCustomer survey cards are distributed periodically at office locations to a representative sample of clients receiving services.</p> <p>^cBeginning in FY03, includes all eviction prevention grants issued using Emergency Services funds. Previously, only certain emergency checks were included.</p> <p>^dIncludes all grants issued that were not related to obtaining or maintaining housing, i.e., burial, utility, moving, storage, and transportation. Does not include persons issued grocery store food certificates.</p> <p>^eSix staff positions were transferred from the Regional Services Centers during FY04.</p> <p>^fFY06 increases reflect the inclusion of Supportive Housing Services and the addition of \$60,000 to add a personal financial management component for 200 clients.</p>					
EXPLANATION: <p>This program provides assessment, case management (including referral to community emergency assistance providers), and financial assistance to households to prevent loss of employment, eviction, and homelessness. Utilizing Federal/State Emergency Assistance to Families with Children funds and County grants, social workers can provide assistance such as payment of rent and utility arrearages, security deposits, move-in expenses, and moving and storage expenses. Stabilizing individuals in housing is cost-effective in preventing the social disruption of families associated with becoming homeless (with all the attendant consequences), and in preventing the greater expense of providing emergency shelter services. Supportive services help families who have been assisted with housing to take the necessary steps to ensure the self-sufficiency of the family.</p>					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Emergency Assistance Coalition, United Way FEMA Program, Housing Opportunities Commission, Department of Housing and Community Affairs, Sheriff's Office.					
MAJOR RELATED PLANS AND GUIDELINES: Locally defined program guidelines, Local Temporary Cash Assistance Plan.

Workyears ^e	1.9	1.9	1.9	2.0	1.9
Notes: ^a The Mental Health Statistics Improvement Program (MHSIP) scale is a consumer-oriented instrument used to measure clients' progress in psychological symptoms and level of functioning. ^b Neighbors, family, and other agencies refer the elderly to this service. An initial goal (and measure of success) is for those referred (who often initially do not want the service) to accept a home visit and services. ^c In FY03, after a serious safety issue arose, training was provided to Springfield Hospital Center staff and Montgomery County police officers, as well as Department of Health and Human Services staff. Consequently, the FY03 results for this measure were higher than usual. ^d The budget increase reflects the merging of all Senior Programs in FY05, including Senior Outreach, Hispanic Outreach, Peer Counseling, and Prevention and Early Intervention Mental Health Services. ^e Workyears include oversight, clinical direction, contract monitoring, training, consultation, and administrative support.					
EXPLANATION: Senior Mental Health Services provides mental health services in the individual's home or at a senior site to clients 60 years old and older - both English and Spanish speaking - who cannot or will not access traditional office-based services. Assessment, psychiatric evaluation, and brief treatment are provided until ongoing services can be established for the patient. Peer counseling is also provided to homebound isolated seniors dealing with difficult life issues. The Prevention and Early Intervention program works with seniors in the community utilizing psycho-educational services, pre-admission visits, and drop-in groups at senior centers. This program also provides mental health consultation about mental health problems to Senior Center directors, Housing Opportunities Commission resident counselors, and assisted living providers. In addition, mental health consultation and training is provided to professionals who are working with senior mental health issues.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Aging and Disability Services, Crisis Center, family members, assisted living providers, Housing Opportunities Commission resident counselors, Meals on Wheels, visitors, Police.					
MAJOR RELATED PLANS AND GUIDELINES: Maryland Department of Health and Mental Hygiene Senior Mental Outreach Services Grant.

Number of clients completing orientation	678	524	^a 379	500	555
Number of clients served in Outpatient Treatment	370	410	384	400	425
Number of clients served in Methodone Assisted Treatment Program	80	79	77	80	110
Number of clients served with co-occurring disorders ^c	315	352	322	317	382
Number of clients provided vocational rehabilitation services	162	305	155	175	215
Inputs:					
Expenditures (\$000) ^b	2,315	2,421	2,380	2,534	^d 2,899
Workyears ^b	24.8	24.8	24.7	24.7	^d 27.8

Notes:

^aThe number of clients completing orientation decreased in FY04 due to the greater number of clients diverted to other appropriate programs and also because of an increased "no show" rate. In FY05, the program intends to reduce the no-show rate for clients referred to it.

^bIncludes operating expenses budgeted in the Service Chief's office in FY02 - FY05. For FY06, operating expenses are budgeted directly in the program. The FY06 increase in workyears reflects the conversion of a half-time position to a full-time position and the redeployment of a full-time position from Addiction Services Coordination to this program.

^cA co-occurring disorder involves both mental health and substance abuse disorders.

^dIncludes enhancing the Methodone Assisted Treatment Program by converting two part-time positions to full-time to serve more than 30 additional clients per year.

EXPLANATION:

This program provides intensive outpatient and chemotherapeutic treatment services for citizens in need of this service model, including self-referred clients, persons referred from the criminal justice system, homeless clients, and clients with other social necessity requirements (e.g., Child Welfare Services referrals). Special emphasis is placed on treating addicted women with children, the homeless, opiate addicts, and individuals with co-occurring substance abuse and psychiatric disorders.

The number of clients screened for services decreased in FY04 due to the greater number of clients diverted to other appropriate programs (such as the Avery Road Combined Care Programs and the Substance Abuse Services for Women Program) and also because of a higher "no show" rate. For FY05, the program intends to decrease the no-show rate for clients referred to it.

In FY04, the number of clients employed at the end of treatment and receiving vocational services declined due to the loss of funding for the Montgomery College contract for training clients in basic computer skills and the loss of the Montgomery County Public Schools contract for GED training. In FY04, about 150 clients were provided vocational rehabilitation services, a reduction of approximately 50% over the number served in FY03. A new strategy was developed to offset the loss of the vocational training contracts in FY04. Vocational specialists initiated outreach to clients interested in vocational services during the assessment phase of treatment. As a result, the percentage of clients employed at the end of treatment did not decline as significantly as had been projected: in FY04, 32% were still employed at the end of treatment, only a slight decline from FY03. This funding loss was also projected to affect the percentage of successful cases discharged in FY04. However, the declines in this area were greater than had been projected: in FY04, only 22% of clients were successfully discharged from treatment, down from 29% in FY03.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Department of Correction and Rehabilitation, Montgomery County Police Department, Housing Opportunities Commission, Division of Transit Services, Alcohol and Drug Abuse Administration, District Court, Circuit Court, non-profit organizations.

Workyears ^b	16.6	18.4	18.4	18.4	18.4

Notes:

^aSafety plan steps include filing a civil protective order, moving to a friend's home, etc.

^bAs measured by the Domestic Violence Survivor Assessment, which tracks ten dimensions of the physical, psychological, and social impact of partner abuse. All clients who receive ongoing counseling are assessed as to whether and how they move through the safety steps: pre-contemplation (or consciousness raising), contemplation (or preparation), action, and maintenance stages of making changes with regard to the problem of domestic violence in their lives.

EXPLANATION:

Partner Abuse Services provides counseling, shelter, and support to victims of partner-related physical abuse and counseling to abusers in order to increase the safety and well-being of victims of domestic violence. Key to stopping intimate partner violence is a coordinated community response, within which human services play a crucial role. Program staff work closely with the justice system and other community partners to hold abusers accountable for their behavior and maximize the safety of the victim and the family's children.

The Abused Persons Program assists most victim clients to take sufficient legal and other steps, such as filing civil orders and/or criminal charges to establish relative safety from domestic violence. In addition, the smaller number who continue in counseling are helped to move forward in the stages of recovery of autonomy from domestic violence victimization. Most remain in counseling long enough to move through at least one of four stages.

The program also serves those who have perpetrated abuse, about 7% of whom are women and about 10% of whom are not mandated by any court or agency. The standard counseling service for these persons includes a full psychosocial assessment, case management of any relevant problems (primarily substance abuse or other mental health problems), and counseling, usually in a time-limited group format addressing attitudes towards family violence and skill deficits that can lead to partner abuse. Recent years' findings have pointed to a success rate in helping participants to stop abuse that is typical of such programs nationally. The program will continue to work on tailoring its victim and abuser interventions to client needs as well as investigating further measures of progress.

The program also offers or facilitates community educational programs to build community awareness of the problem, improve the ability of potential victims and their families to access needed legal and human services, and foster effective responses to domestic violence by the community. The program provides or coordinates counseling services for children who have witnessed domestic violence to mitigate its impact on their lives and future development.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Montgomery County Police, Sheriff, State's Attorney, Department of Correction and Rehabilitation, and Circuit Court; Maryland Department of Human Resources; Family Violence Council.

MAJOR RELATED PLANS AND GUIDELINES: COMAR 7-6, 4-501, and 4-516, "Guidelines for Abuser Intervention Programs," Lt. Governor's and Attorney General's Family Violence Council, 1997.

Notes: ^a This new measure is required by the Maryland Department of Human Resources and replaces the previous, more limited measure, "percentage of victim clients who take at least one safety action step." Safety plan steps include filing a civil protective order, moving to a friend's home, etc. ^b Beginning in FY03, includes all relevant administrative, victim assistance, and other staff costs.					
EXPLANATION: As part of its array of services, Partner Abuse Services provides counseling and shelter to victims of partner-related physical abuse. Since opening in 2000, the Betty Ann Krahne Center shelter (BAKC) has afforded the opportunity for longer stays (often necessary due to the County's continuing lack of affordable housing), but some victims in need of emergency shelter were unable to be placed in the BAKC and were housed under other arrangements. Enhancements made to the shelter in FY03 helped the provider place more emphasis on alternative living accommodations and safety planning in order to reduce the length of stays in the shelter and provide space for an increased number of admissions for emergency cases. Now, most clients are able to leave the shelter for a safer housing situation within 90 days of admission. However, the County's housing shortage continues to affect many of these victims and their families. A new provider assumed responsibility for the shelter in July 2003. Based on discharge plans, in FY04, 82% of the families leaving the Betty Ann Krahne Center shelter achieved safer living conditions, and 88% of those who terminated indicated positive ratings of services received. Efforts will continue to provide services to deal with the multiple needs of many of these survivors and to maintain positive outcomes, placing them on the road to healing and lives free from abuse.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Montgomery County Police, Sheriff, State's Attorney, Department of Correction and Rehabilitation, and Circuit Court; Maryland Department of Human Resources; Family Violence Council.

Number of applications approved for benefits	2,674	3,634	4,224	4,010	4,200
Inputs:					
Expenditures (\$000) ^b	382	582	576	689	709
Workyears ^b	5.2	5.2	4.2	4.2	4.2
Notes: ^a The number of households eligible to receive program benefits is estimated by determining the number of households (by household size) in Montgomery County whose household income is at or below 150% of the Federal Poverty Level. The Maryland Department of Human Resources estimates, based on the 2000 census, that 27,280 Montgomery County households might be eligible. ^b Expenditures include the estimated amount for grants issued directly by the County and reimbursed by the Department of Human Resources. This amount fluctuates each year depending upon fuel cost, temperature, and the percentage of applicants receiving benefits that use wood and oil as their fuel source. Beginning in FY03, expenditures include the cost of manager time spent on this program element. Funding from the Maryland Department of Human Resources for a full-time case worker position was cut in FY04. Beginning in FY04, expenditures include a \$160,000 special County appropriation to minimize the impact of increased County energy tax rates by providing 4,000 low-income households that qualify for the Maryland Energy Assistance Program with an average of \$40 per household toward their heating costs. FY06 annualizes the energy assistance rebates.					
EXPLANATION: The Home Energy Assistance Program helps low-income households meet their electricity and heating costs. Reducing the high cost of home energy helps prevent utility disconnections. The Federal Department of Health and Human Services makes grants to states. Maryland grants are administered by the Department of Human Resources. The Department of Human Resources contracts with local agencies to operate the Maryland Energy Assistance Program which disburses the Federal grants. The Electrical Universal Services Program is a State program funded through the collection of fees from residential, industrial, and commercial electric customers. Both programs provide assistance to households whose income is at or below 150% of the Federal Poverty Level and who are responsible for their heating and/or utility costs. Lump sum grants are issued on behalf of a household once per year after processing mail-in applications. Households may be denied if they either fail to meet the eligibility criteria or fail to provide requested documentation to determine their eligibility. County staff conduct outreach to make more eligible households aware of the program. They also work with applicants to assist them with application completion and documentation in an effort to reduce the number of denials due to failure to submit verification. In FY04, close to 5,000 applications were processed, and 4,224 applicants were approved for home energy assistance. Nevertheless, these accounted for only 16% of the estimated eligible County households.					
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Maryland State Department of Human Resources, non-profit community service organizations, utility service suppliers.

Workload/Outputs:						
Number of applications received and processed	3,018	2,858	3,514	3,000	3,500	
Number of applications approved for benefits ^b	2,093	1,798	2,381	1,800	2,450	
Inputs:						
Expenditures - total (\$000) ^c	3,824	3,678	3,799	3,776	4,105	
Expenditures - administrative costs (\$000)	249	259	342	316	332	
Workyears ^c	4.7	4.7	4.7	4.7	4.7	
Notes: ^a Based on 2000 Census data from the Montgomery County office of the Maryland-National Capital Park and Planning Commission, it is estimated that approximately 37% (37,410) of Montgomery County's 101,221 rental households have an income below 50% of the area median income (\$35,797). ^b Includes all applications approved for benefits, including those placed on a waiting list due to the unavailability of funds. ^c Includes 0.2 workyear for a program manager budgeted in Transitional Housing.						
EXPLANATION: The Rental Assistance Program helps low-income households, the elderly, and disabled persons on fixed incomes who spend a disproportionate amount of their income on rent maintain rental units appropriate to their needs. Reducing the monthly rent burden for low-income households helps keep families out of substandard housing and also helps prevent eviction and homelessness. Monthly monetary assistance is provided to eligible households of at least two members and to persons who are at least 62 years old or disabled. Eligibility is limited to households with assets of less than \$10,000 and incomes below 50% of the area median income with a rent burden of more than 25% to 35% of their gross monthly household income relative to household size. Applications are accepted by mail. Households are denied if they either fail to meet the eligibility criteria or fail to provide the requested documentation needed to determine their eligibility. County staff conduct outreach efforts to make more eligible renters aware of the program. They also work with applicants to assist with application completion and documentation requirements to reduce the number of denials due to failure to submit eligibility verification. The number of applications received and processed rose from 2,858 in FY03 to 3,514 in FY04, an increase of 23%. The number of applications approved for benefits in FY04 was 2,381, an increase of 32% over the number of applications approved for benefits in FY03. These increases occurred in a year when the expenditures for the program rose by only 3% and staffing was unchanged - equivalent to a productivity increase of over 20% as measured by applications processed per workyear.						
PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Housing Opportunities Commission, Montgomery County Department of Finance, Department of Housing and Community Affairs, City of Rockville Housing Authority, private nonprofit housing programs for special populations.

Workyears ^c					
Single adults	1.0	2.25	2.25	2.25	2.25
Families	1.0	2.25	2.25	2.25	2.25
Notes:					
^a In FY02, includes only data from the Community Based Shelter program.					
^b Includes all transitional shelters (Bethesda House, Carroll House, Chase Men's Shelter, Dorothy Day Place, and Watkins Mill House). The Community Based Shelter was counted as an emergency shelter, although it is now primarily transitional. Most individuals in transitional shelters have also received services in an emergency shelter.					
^c Beginning in FY03, inputs include all relevant administrative and personnel costs to support these programs. However, they do not include the cost of placing clients in motels when they cannot be placed in the shelter system, and they do not reflect case management day programs. Funds were added in FY05 to expand services at the Gude Men's Shelter.					
^d Estimates. Complete data are not available for all shelter programs this year from the new automated Homeless Tracking System. Modifications to the data system have been made to allow for accurate reporting in FY05.					
EXPLANATION:					
Shelter Services provides shelter, case management, and support services to homeless individuals and families in order to ensure stable housing and to prevent weather-related deaths of homeless persons. Research suggests that to increase the likelihood that a homeless individual will become self-sufficient, a mix of housing and supportive services is needed. To address the problem of homelessness, it is necessary to target services to subpopulations such as those with serious mental illness, chronic substance abuse, or both. Interventions are most likely to be effective if they are based on strategies specific to cultural and ethnic subgroups and address barriers that prevent different groups from moving through the system.					
Research conducted on the chronically homeless suggests that without interventions that address the underlying causes of homelessness, the length of time single adults remain in emergency shelter increases. Barriers to interventions with the chronically homeless include the difficulty of engagement and treatment compliance for those living on the streets for long periods of time.					
In late FY04, the new Seneca Heights Program opened and provided more stable housing for families (17 new transitional housing units) and for single adults (40 units of individual permanent housing). Additionally, the Partnership for Permanent Housing for Families continued to add more rental units for families. While services are designed to move homeless families and individuals to stable housing and self sufficiency, during the winter months shelter capacity is expanded to focus on the fundamental objective of preserving human life.

Contract monitor workyears	1.5	1.5	1.5	^d 2.0	^d 2.0
Notes: ^a Excludes seven contracts that primarily provide commodity-based one-time services associated with mental health support services. ^b Includes an unduplicated count of customers served in outpatient mental health clinics and a duplicated count of customers served in multiple grant funded mental health services. ^c Expenditures include funds awarded by the County, the State Community Mental Health Grant, the Federal Mental Health Block Grant, and the Projects for Assistance in Transition from Homelessness (PATH) Grant for the provision of mental health services not reimbursable by the Public Mental Health System. ^d Workyears for contract monitoring were increased in FY05 due to increased monitoring requirements (fiscal, audit, programmatic) for contractual services as required by the Mental Hygiene Administration. This change increases the average cost of monitoring a service contract.					

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM:

System Planning and Management

PROGRAM ELEMENT:

Contract Monitoring

EXPLANATION:

The System Planning and Management Team, also known as the Core Service Agency (CSA), is authorized to plan, monitor, evaluate and develop a system of behavioral health care in Montgomery County and is designated by the State of Maryland as the mental health authority for the State Public Mental Health System. The overall goal is to create an environment where children and adults with mental health needs are recognized as an integral part of the community with access to treatment services that promote mental wellness and recovery. The CSA does not provide direct services but works to ensure that clinically appropriate services are available for mental health consumers and families.

The contracts represent a wide range of specialized mental health services that are provided to mental health consumers in Montgomery County. These services range from residential services, vocational training and employment assistance, outreach and case management services to respite care, consumer-run services, therapeutic nursery services, and parent training. Specialized mental health services that are procured under contracts provide quarterly contract monitoring and outcome reports that indicate the number of consumers served, the number of consumers with improved results such as engagement in mental health treatment, the number of consumers who obtain financial entitlements, the number of consumers evaluated and treated for mental health needs, the number of consumers hired on a part-time or volunteer placement, etc. The System Planning and Management Unit monitors each of the 37 contracts through annual site visits, site inspections, and concurrent monitoring visits with State licensing agents.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: The Mental Hygiene Administration in Maryland's Department of Health and Mental Hygiene, Mental Health Advisory Committee, Collaboration Council, National Alliance for the Mentally Ill in Montgomery County, Commission on Aging, Coalition for the Homeless, Housing Opportunities Commission, Department of Housing and Urban Development, providers participating in the Public Mental Health System, County-funded mental health providers. County government partners that incorporate behavioral services include Mental Health Services, Addiction Services, Aging and Disability Services, the Juvenile Assessment Center, the Department of Corrections and Rehabilitation, and the Department of Housing and Community Affairs.

MAJOR RELATED PLANS AND GUIDELINES: FY05 and FY06 System Planning and Management/Core Service Agency Plan/Budget, Maryland Department of Health and Mental Hygiene Annual State Mental Health Plan, Community Mental Health Grant, Federal Mental Health Block Grant, PATH (Projects for Assistance in Transition from Homelessness) Grant, Maryland American Psychiatric Systems (MAPS) Provider Manual, Montgomery County Mental Health Strategic Plan, Blue Ribbon Task Force.

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM:

24-Hour Crisis Center

PROGRAM ELEMENT:

Assertive Community Treatment (ACT) Team

PROGRAM MISSION:

To increase the self-sufficiency and health of the seriously and persistently mentally ill for whom conventional outpatient treatment and inpatient hospitalization have not been effective

COMMUNITY OUTCOMES SUPPORTED:

- Children and adults who are physically and mentally healthy

PROGRAM MEASURES

	FY02 ACTUAL	FY03 ACTUAL	FY04 ACTUAL	FY05 BUDGET	FY06 CE REC
Outcomes/Results:					
Percentage of clients who require any psychiatric hospitalization	5	10	7	10	10

Outputs/Workload:					
Number of clients served	76	70	98	80	95
Inputs:					
Expenditures (\$000)	972	1,028	1,030	1,109	1,333
Workyears	11.0	11.3	11.3	11.3	12.9

Notes:

^aThe percentage of patients incarcerated is projected to increase slightly due to a focus on higher risk clients.

^bIn FY04, the cost per client served was substantially lower than in FY03 due to the greater number of individuals served as a result of an unusual combination of factors: several patients transferring from hospitals to community providers, and several patients relocating to the area.

EXPLANATION:

The purpose of the ACT Team is to provide community based, multi-disciplinary mental health services to the seriously and persistently mentally ill population for whom conventional outpatient treatment and inpatient hospitalization have not been successful. The outcome measures focus on some of the characteristics that indicate increased levels of functioning from a holistic perspective: accepting shelter or moving into independent housing instead of living on the streets, avoidance of arrests, and meeting basic medical needs. The continued low arrest rate is a particular success since it is much lower than expected or previously experienced for this difficult-to-serve population. Research shows that due to the severity of mental illness experienced by those patients who are typically served by ACT teams, improvements in specific indicators may not be seen for a year or more after engaging with the team.

Although episodic hospitalization is required for some patients, this is not necessarily an indication that they are becoming less stable. The ability to get a patient into the hospital to prevent a serious problem is part of the process of changing the course of their illness. The ACT Team has been successful in shifting patient treatment out of emergency rooms to ongoing outpatient treatment and case management.

In FY04, 98 clients were served by the ACT Team. Of these, 97% of the clients served were medically stabilized. Only 1% were arrested, and 7% required psychiatric hospitalization. The percentage of clients in stable living arrangements improved significantly to 83% in FY04. During FY05, a Substance Abuse and Mental Health Services Administration grant was received through the Maryland Mental Hygiene Administration designating Montgomery County as one of two primary sites in the State to receive additional training regarding this best practice model. As changes are made in the local model, they will also be taught to other ACT teams across the State. The projected increase in the number of patients served for FY06 is due to the 1.6 workyear staff increase.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Montgomery General Hospital, Washington Adventist Hospital, Shady Grove Adventist Hospital, Holy Cross Hospital, Suburban Hospital, Charter Potomac Ridge Hospital; community residences; Coalition for the Homeless; Mental Health Association of Montgomery County; Progress Place; Community Clinic; Community Ministries of Rockville; Community Ministry of Montgomery County; Montgomery County Police Department; Springfield Hospital Center.

Workyears	33.9	33.6	33.6	33.6	^f 32.5

Notes:

^a"Stabilized" means that the mental health needs of the client are addressed and the client is not a risk to him/herself or others.

^bTriage and Evaluation clients are stabilized when they do not require involuntary hospitalization at discharge. The Program seeks to provide services such that clients do not need involuntary or voluntary hospitalization at discharge and can function satisfactorily in the community with only outpatient services. However, it is difficult to collect data to determine the success rate of this effort.

^c"Crisis stabilization services" are on-going services for up to four sessions provided to those patients who either require no additional mental health services or those who are in need of services in the interim until services in the Public Mental Health System are available. The reduction in symptoms will be measured by pre- and post-administration of a symptom identification and rating scale.

^dData for the "TBD" entries have been entered into the data system, but the necessary reporting capabilities are still being developed for the new data system.

^eThe number of individuals served in the Triage and Evaluation Beds is expected to increase substantially in FY05 due to increased need associated with new programs such as the Pre-Booking Diversion Program that is part of the Criminal Justice Behavioral Health Initiative.

^fThe FY06 reduction in workyears represents net lapse.

HEALTH AND HUMAN SERVICES

Behavioral Health and Crisis Services

PROGRAM:
24-Hour Crisis Center

PROGRAM ELEMENT:
Crisis Services

EXPLANATION:

The Crisis Center responds to a range of crisis situations with strategies that include crisis telephone services, walk-in services, and the Mobile Crisis Team. Psychiatric Stabilization Services allow mentally ill individuals immediate access to evaluation, medication, and monitoring until they can access the Public Mental Health System. The Mobile Crisis Team (MCT) provides emergency mental health services to individuals at any location in the community to stabilize the situation with the least restrictive method possible.

The Crisis Center also provides Critical Incident Stress Management (CISM) which offers groups who have experienced a traumatic incident a forum in which to discuss their reactions, be educated about the signs and symptoms of stress, and learn how to connect with additional services if necessary. The purpose of CISM is to assure that individuals recover optimally and avoid problems such as post traumatic stress disorder, anxiety, or depression. Incidents that may require CISM include train accidents, murders, suicides, or terrorist activities. The CISM response may be provided at the site of a traumatic situation and may include working with family members and on-lookers.

The Crisis Center is currently working on several initiatives related to disaster mental health with the Mental Health Association of Montgomery County (MHA) and the Montgomery County Public Schools (MCPS), including the Volunteer Corps of Montgomery County which provides mental health professionals to respond to disaster situations. This initiative received the National Association of Counties 2004 Acts of Caring Award. A memorandum of understanding was implemented between the Department of Health and Human Services, MHA, and MCPS allowing for the sharing of mental health assets during critical incidents or disasters.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Mental Health Association of Montgomery County, Springfield Hospital Center, Montgomery General Hospital, Washington Adventist Hospital, Shady Grove Adventist Hospital, Holy Cross Hospital, Suburban Hospital, Charter Potomac Ridge Hospital, community residences, Coalition for the Homeless, Progress Place, Community Clinic, Community Ministries of Rockville, Community Ministry of Montgomery County, Montgomery County Police Department, community-based outpatient mental health clinics, Abused Persons Program, Victims Assistance and Sexual Assault Program, Addiction Services Coordination.

Notes:

^aAs reported on the Sexual Assault Myths and Facts test.

^bCommunity Outreach contract included beginning in FY03.

^cFunding reduced due to loss of Federal grant for Federal fiscal year 2004.

EXPLANATION:

The Victim Assistance and Sexual Assault Program (VASAP) provides comprehensive services to sexual assault and general crime victims. A primary function of a rape crisis/general crime victim community education, outreach, and prevention program is to educate the public on sexual assault myths and facts as well as general crime prevention.

While such education is available to all community members, VASAP has targeted specific populations as high priorities. Children and especially adolescents are often at risk for sexual assault or exploitation and are in need of information about how to protect themselves. In addition, disabled women and Spanish-speaking women have been identified by VASAP as being underserved and in need of special outreach by community educators. In FY04, funding for outreach to these underserved populations was reduced, and outreach to disabled women and Spanish-speaking women was discontinued. Funding was also reduced significantly for presentations to children and adolescents. Therefore, the number of participants served declined from the prior year. Despite the decrease in funding, VASAP was able to offer excellent service to those it did reach, with both the outcome and service quality measures remaining high.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Crisis Center, Abused Persons Program, Public Health/STD Clinic, School Health Services, Montgomery County Police, Maryland-National Capital Park and Planning Commission Park Police, State's Attorney's Office, Montgomery County Public Schools, Circuit and District Courts, hospitals, Maryland Department of Human Resources, Governor's Office of Crime Control and Prevention, Maryland Coalition Against Sexual Assault.

Notes:
EXPLANATION:

The Victim Assistance and Sexual Assault Program (VASAP) provides comprehensive services that include ongoing counseling and victim assistance for child, adolescent, and adult victims of rape and general crime. Crime victims and their families benefit from services that assist them in understanding and using the criminal justice system and resolving the trauma caused by the violence they have experienced. Victims of crime and their families are offered a variety of interventions such as group therapy, individual and family counseling, as well as psycho-educational groups in a supportive setting to help them resolve grief and anger caused by victimization, to develop an appropriate sense of the meaning of the experience, and to learn new skills to maintain safety. Crime victims receiving VASAP group and individual counseling in addition to victim assistance services report a reduction in distress.

In FY04, 750 child crime victims were served - 66 more ongoing child cases than in FY03. Of these, 78% reported a decrease in symptoms, which is more than in FY03. In FY04, the total adult victims served climbed to nearly 2,000. Of those, 85% demonstrated a reduction in symptoms.

PROGRAM PARTNERS IN SUPPORT OF OUTCOMES: Crisis Center, Abused Persons Program, Public Health/STD Clinic, Montgomery County Police, School Health Services, Maryland-National Capital Park and Planning Commission Park Police, State's Attorney's Office, Montgomery County Public Schools, Circuit and District Courts, hospitals, Maryland Department of Human Resources, Governor's Office of Crime Control and Prevention, Maryland Coalition Against Sexual Assault.

Notes: ^a As reported by the victim using the Victim Assistance Evaluation form.					
EXPLANATION: The Victim Assistance and Sexual Assault Program (VASAP) provides a comprehensive array of services which include ongoing counseling and victim assistance for victims of rape and general crime. Crime victims receive help in understanding and using the criminal justice system and in resolving the trauma caused by the violence they have experienced. When victims are witnesses for the State, "Victim Assistants" can accompany the victim through the Court process. In consultation with the State's Attorney's Office, Victim Assistants can advocate for cases to be moved, when appropriate, from the District to the Circuit Court - thus assuring a more serious penalty for a convicted felon. Victims with lower income can receive financial assistance through the County's Victim Compensation Fund and/or through the State's Criminal Injuries Compensation Board. Compensation can pay related medical bills, property repair, lost wages, and funeral expenses - thus mitigating the profound financial impact of the crime. However, these funds cover only a small portion of the concrete damages crime victims incur. In FY04, 759 crime victims received Victim Assistance services. Due to retirements of victim assistance staff during this fiscal year, fewer clients were served than in FY03. In FY04, 96% of victims reported that services were effective and valuable, which is a somewhat higher percentage than during FY03. Service quality, as measured by client satisfaction, also remains very high at 100%.
